#### SHAPEAI

TRAINING AND INTERNSHIP SYLLABUS

# Full Stack Web Development

**LEARN FROM PEOPLE AT:** 

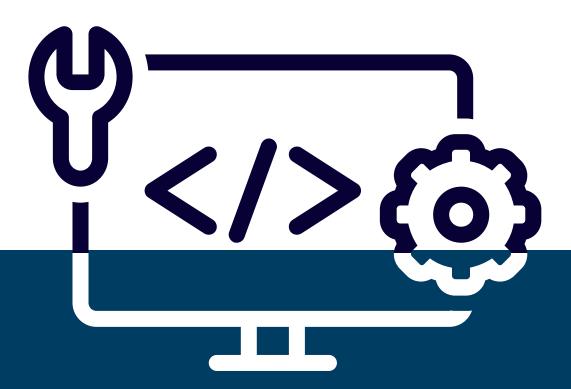

#### **BATCHES STARTING FROM:**

- 1ST JUNE 2021
- 1ST JULY 2021

**ONLINE LIVE CLASSES** 

+91 99837 42739 shapeured@gmail.com shapeai.tech

## OVERVIEW

The goal of this Training and Internship Program is to equip interns with the unique skills they need to build database-backed APIs and web applications with the proper industry-level front-end as well as scale up the deployment for the millions. A graduate of this program will be able to design and build databases for software applications, create and deploy database-backed web APIs, and secure and manage user authentication and access control for an application backend. They will be able to build a production-level frontend according to the industrial standards. Students will also learn how to deploy an entire web application to the cloud using Docker and Kubernetes and how to maintain and scale them.

Prerequisite Knowledge: You are not supposed to have any prior programming knowledge. However, you are expected to know the basics of differential calculus.

## WHY JOIN US?

Complementary videos on Programming in C++ and Data Structure and Algorithms

Competitive Programming practice questions on a daily basis

2-hour LIVE Classes 5-days a week

Recordings available of LIVE classes

2-hour LIVE Doubt Sessions 5-days a week

**Interview Preparation** 

Certification and Letter of Recommendation

15+ Hands-on projects

Instructor from top MNCs

## DATA STRUCTURES AND ALGORITHMS

You will be taught how to program in C++ (a high-performance programming language) and gain knowledge of different data structures and algorithms that can be implemented to solve an open-ended problem.

#### **Topics Included**

Introduction to Programming in C++ | Mathematics | BitManipulation | Recursion | Arrays | Searching | Sorting | Matrix | Hashing | Strings | Linked Lists | Stack | Queue | Deque | Trees and BST | Heap | Graph | Greedy Algorithms | BackTracking | Dynamic Programming | Trie | Segment and Binary Indexed Trees | Disjoint Sets

## WEB DEVELOPMENT FUNDAMENTALS

We will start with the fundamentals that are essential to become a web developer.

#### **Topics Included**

- web protocols HTTP, HTTPS etc
- HTML
- CSS
- Git, GitHub, and Version control
- Responsive Design with CSS
- Grid and Box Layouts
- Tailwind CSS
- Bootstrap CSS
- JavaScript ES6

#### **FOOD DELIVERY APP**

Landing page for a food delivery app with HTML & CSS.

Task management app with Tailwind CSS & JavaScript.

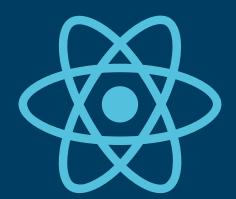

## FRONT END DEVELOPMENT WITH REACT

We will learn how about analyzing and deciding on components with the state that can be reused to build a scalable UI.

#### **Topics Included**

- Getting Started with React
- Component Life Cycle Methods
- React Functional Components
- Webpack
- Using a Third-Party Component4 lectures
- Styling React
- Routing in React
- React Hooks
- State Management In React with Redux
- Connecting To Backend

# B A C K E N D D E V E L O P M E N T

We will learn about architecting & building a scalable and secure backend for an application of any size.

#### **Topics Included:**

- NodeJS
- Express
- Microservices with Node & Express
- Integrating MongoDB
- Validation and Error handling
- Building RESTful APIs with Node, Express & MongoDB
- Authentication and Security

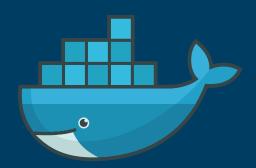

### DEV-OPS

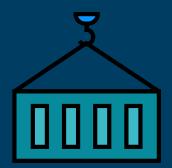

By leveraging the power of containers & CICD, learn how to securely move your app to the cloud and learn how to set up the Kubernetes cluster to manage your application in production.

#### **Topics Included:**

- Docker & Containers
  - Building and manipulating single and multiple containers with Docker
  - Docker volumes and docker-compose
  - Containerizing an application with docker
  - Securing with Synk
- Automate with CICD
  - CICD service setup
  - Write CICD scripts
  - Automate deployments and testing with CICD

## DEV-OPS CONTINUED

#### **Topics Included:**

- Kubernetes container orchestration
  - K8s commands
  - Multi-container app with K8s
  - Ingress to handle traffic
  - Deployment with K8s
  - Custom Domain & SSL (HTTPS)

#### **BOOK MY SHOW CLONE**

Here you will be making a Clone for the Book my show Website using React and Redux.

#### **ZOMATO FRONT END**

Build UI for the master project ie. Zomato Clone and redux action to communicate with the backend.

Need help? Contact: +91 99837 42739

Data Analyst | 12

#### **BOOK MANAGEMENT API**

Make a website for managing different books in a library.

#### **ZOMATO BACK END**

Designing and building APIs for the master project ie. Zomato Clone with node, express & mongoDB

Need help? Contact: +91 99837 42739

Data Analyst | 12

#### TASK MANAGEMENT APP

Make a Task Management appusing Tailwind CSS and JavaScript and deploy it to the Web using AWS.

# ZOMATO DEPLOYMENT AND DEVOPS

We will Deploy the Zomato Website to AWS and use the Docket and Kubernetes to orchestrate it.

Need help? Contact: +91 99837 42739

Data Analyst | 12

#### **PERSONAL PORTFOLIO**

Create your very own Personal Portfolio to share with your friends or add to your resume.

# ABOUT THE COURSE

**DURATION**2 Months

PRICE INR 5500

LIMITED SEATS AVAILABLE
